General observations and summary of the site:

The factory was established in 2014 the building structure is concrete. Main product manufactured at the facility was sport shoes. The regular working hours of administrative and production employees were from Monday to Friday, from 07:00 a.m. to 05:00 p.m. with 15-minute tea breaks at 10:00 a.m. and 15 mins. tea break 04:00 p.m. respectively, and 60 mins. lunch break at 12:00 p.m. Saturdays and Sundays were granted as weekly rest days.

Good Examples:

- GE-1: Free food is provided to the employees.
- GE-2: Free transportation service is provided to the workers

Auditor arrived to the facility at 09:00 am on 01.06.2022 and held an opening meeting according to the ETI Base Code. The facility management was present in the meeting and showed a positive attitude to the audit process. Opening and closing meeting was held with Mr. Baver Kaya – CSR Responsible who is responsible for social compliance management systems in the factory. During the audit, factory management provided documentation for the audit, allowed site tour and worker interviews. Based on auditor's audit assessment, there is no non-compliance was noted during this audit and factory fulfils the requirements of ETI Base Code and local laws. The following Good Example has been noted as a result of this audit.

**Please note the table above records the total number of Non-compliances (NC), Observations (Obs) and Good Examples (GE). This gives the reviewer an indication of problem areas but does not detail severities of each issue – Reviewers need to check audit results by clause.*

- No

L1: If yes, please give details: There is an annual worker satisfaction survey conducted by management in the factory. Auditor saw records and improvements made, including improved food in the canteen.

M: Attitude of workers:

(Include their attitude to management, workplace, and the interview process. Both positive and negative information should be included) Note: Do not document any information that could put workers at risk

10 employees (as per Best Practise Guidance) were interviewed during the audit. They were elected in accordance with their age, sections, experience in the firm, and information existent in personnel file records, contracts, health care reports and risk analysis. According to the interviews, workers are thinking positively about working the firm. Many of them highlighted those payments are stable and there is no delay in payments. They also commented that employment in the firm in comparison with the other factories around the same location is one of the best. Most of the workers were very calm during the interview and provided answers to the questions without hesitation. They additionally commented that in the firm everything is in order, and every worker knows what is his/her part is therefore their Terms of Reference is clear for them. Moreover, employees mentioned that they receive regular trainings, both OHS and technical. Some of the employees mentioned the level of dust in the workplace that it sometimes can be a challenge. When they were asked about if there are systems in place to ensure the employee health is protected, they stated that periodic health checks are concluded every year, and PPE equipment were provided to all staff considering their needs in every related section.

N: Attitude of worker's committee/union reps:

(Include their attitude to management, workplace, and the interview process. Both positive and negative information should be included) Note: Do not document any information that could put workers at risk

There were 2 representatives who were elected by the workers and participated into the interview. Worker representatives were neutral and provided answers to our questions.

O: Attitude of managers:

(Include attitude to audit, and audit process. Both positive and negative information should be included)

Managers were very cooperative and transparent during auditor's interview process.

ETI

6.1 Working hours must comply with national laws, collective agreements, and the provisions of 6.2 to 6.6 below, whichever affords the greater protection for workers. Sub-clauses 6.2 to 6.6 are based on international labour standards.

6.2 Working hours, excluding overtime, shall be defined by contract, and shall not exceed 48 hours per week.

6.3 All overtime shall be voluntary. Overtime shall be used responsibly, taking into account all the following: the extent, frequency and hours worked by individual workers and the workforce as a whole. It shall not be used to replace regular employment. Overtime shall always be compensated at a premium rate, which is recommended to be not less than 125% of the regular rate of pay.

6.4 The total hours worked in any 7-day period shall not exceed 60 hours, except where covered by clause 6.5 below.

6.5 Working hours may exceed 60 hours in any 7-day period only in exceptional circumstances where **all** of the following are met:

- this is allowed by national law;
- this is allowed by a collective agreement freely negotiated with a workers' organisation representing a significant portion of the workforce;
- appropriate safeguards are taken to protect the workers' health and safety; and
- The employer can demonstrate that exceptional circumstances apply such as unexpected production peaks, accidents or emergencies.

6.6 Workers shall be provided with at least one day off in every 7-day period or, where allowed by national law, 2 days off in every 14-day period.

Current Systems and Evidence Examined

To complete 'current systems' Auditors examine policies and written procedures in conjunction with relevant managers, to understand, and record what controls and processes are currently in place e.g. record what policies are in place, what relevant procedures are carried out, who is/are responsible for the management of this item of the code. Evidence checked should detail any documentary or verbal evidence shown to support the systems.

Current systems:

The regular working hours of administrative and production employees were from Monday to Friday, from 07:00 a.m. to 05:00 p.m. with 15-minute tea breaks at 10:00 a.m. and 15 mins. tea break 04:00 p.m. respectively, and 60 mins. lunch break at 12:00 p.m. Saturdays and Sundays were granted as weekly rest days.

B.4. Compliance Requirements

10B4.1 Businesses as a minimum must meet the requirements of local and national laws related to environmental standards.

10B4.2 Where it is a legal requirement, businesses must be able to demonstrate that they have the relevant valid permits including for use and disposal of resources e.g. water, waste etc.

10B4.3 Businesses shall be aware of their end client's environmental standards/code requirements

10B4.4 Suppliers should have an environmental policy, covering their environmental impact, which is communicated to all appropriate parties, including its own suppliers.

10B4.5 Suppliers shall be aware of the significant environmental impact of their site and its processes.

10B4.6 The site should measure its impacts, including continuous recording and regular reviews of use and discharge of natural resources e.g. energy use, water use (see 4–pillar audit report and audit checks for details).

10B4.7 Businesses shall make continuous improvements in their environmental performance.

10B4.8 Businesses shall have available for review any environmental certifications or any environmental management systems documentation

10B4.9 Businesses should have a nominated individual responsible for co–ordinating the site's efforts to improve environmental performance.

B4. Guidance for Observations

10B4.10 Suppliers should have completed the appropriate section of the SAQ and made it available to the auditor.

10B4.11 Has the site recently been subject to (or pending) any fines/prosecutions for noncompliance to environmental regulations.

Note for auditors and readers. This environment section is intended to take not more than 0.25 auditor days. It is an assessment only and the main requirement is to establish whether a site is meeting applicable environmental laws and/or has any certifications or environmental management systems in place. Following this assessment, the client/supplier may decide a full environmental audit is required (see also best practice guidance/environment and guidance for auditor)

Current Systems and Evidence Examined

To complete 'current systems' Auditors examine policies and written procedures in conjunction with relevant managers, to understand, and record what controls and processes are currently in place e.g. record what policies are in place, what relevant procedures are carried out, who is/are responsible for the management of this item of the code. Evidence checked should detail any documentary or verbal evidence shown to support the systems.

Current systems:

There is a written environment policy of the facility. The facility is meeting its legal obligations on environmental requirements The facility does not use processes with negative environmental impacts.

Note: The focus of this ethical audit is on the ETI Base Code and local law. The additional elements will not be audited in such depth or scope, but the audit process will still highlight any specific issues.

This report provides a summary of the findings and other applicable information found/gathered during the social audit conducted on the above date only and does not officially confirm or certify compliance with any legal regulations or industry standards. The social audit process requires that information be gathered and considered from records review, worker interviews, management interviews and visual observation. More information is gathered during the social audit process than is provided here. The audit process is a sampling exercise only and does not guarantee that the audited site prior, during or post-audit, are in full compliance with the Code being audited against. The provisions of this Code constitute minimum and not maximum standards and this Code should not be used to prevent companies from exceeding these standards. Companies applying this Code are expected to comply with national and other applicable laws and where the provisions of law and this Code address the same subject, to apply that provision which affords the greater protection. The ownership of this report remains with the party who has paid for the audit. Release permission must be provided by the owner prior to release to any third parties.

Guidance

The Corrective Action Plan Report summarises the site audit findings and a corrective, and preventative action plan that both the auditor and the site manager believe is reasonable to ensure conformity with the ETI Base Code, Local Laws and additional audited requirements. After the initial audit, the form is used to re-record actions taken and to categorise the status of the non-compliances.

N.B. observations and good practice examples should be pointed out at the closing meeting as well as discussing non-compliances and corrective actions.

To ensure that good practice examples are highlighted to the supplier and to give a more 'balanced' audit a section to record these has been provided on the CAPR document (see following pages) which will remain with the supplier. They will be further confirmed on receipt of the audit report.

Root cause (see column 4)

Root cause refers to the specific procedure or lack of procedure which caused the issue to arise. Before a corrective action can sustainably rectify the situation, it is important to find out the real cause of the non-compliance and whether a system change is necessary to ensure the issue will not arise again in the future.

See BPG Chapter 7 'Audit Execution' for more explanation of "root cause".

Next Steps:

1. The site shall request, via , that the audit body upload the audit report, non-compliances, observations and good examples. If you have not already received instructions on how to do this then please visit the web site www.global.com.
2. Sites shall action its non-compliances and document its progress via .
3. Once the site has effectively progressed through its actions then it shall request via that the audit body verify its actions. Please visit www.global.com web site for information on how to do this.
4. The audit body shall verify corrective actions taken by the site by either a "Desk-Top" review process via or by Follow-up Audit (see point 5).
5. Some non-compliances that cannot be closed off by "Desk-Top" review may need to be closed off via a "1 Day Follow Up Audit" charged at normal fee rates. If this is the case, then the site will be notified after its submission of documentary evidence relating to that non-compliance. Any follow-up audit must take place within twelve months of the initial audit and the information from the initial audit must be available for sign off of corrective action.
6. For changes to wages and hours to be correctly verified it will normally require a follow up site visit. Auditors will generally require to see a minimum of two months wages and hours records, showing new rates in order to confirm changes (note some clients may ask for a longer period, if in doubt please check with the client).

Guidance on Root Cause

Explanation of the Root Cause Column

If a non-compliance is to be rectified by a corrective action which will also prevent the non-compliance re-occurring, it is necessary to consider whether a system change is required.

Understanding the root cause of the non-compliance is essential if a site is to prevent the issue re-occurring.

The root cause refers to the specific activity/ procedure or lack of activity /procedure which caused the non-compliance to arise. Before a corrective action can rectify the situation, it is important to find out the real cause of the non-compliance and whether a system change is necessary to ensure the issue will not arise again in the future.

Since this is a new addition, it is not a mandatory requirement to complete this column at this time. We hope to encourage auditors and sites to think about Root Causes and where they are able to agree, this column may be used to describe their discussion.

Some examples of finding a “root cause”

Example 1

Where excessive hours have been noted the real reason for these needs to be understood, whether due to production planning, bottle necks in the operation, insufficient training of operators, delays in receiving trims, etc.

Example 2

A non-compliance may be found where workers are not using PPE that has been provided to them. This could be the result of insufficient training for workers to understand the need for its use; a lack of follow-up by supervisors aligned to a proper set of factory rules or the fact that workers feel their productivity (and thus potential earnings) is affected by use of items such as metal gloves.

Example 3

A site uses fines to control unacceptable behaviour of workers.

International standards (and often local laws) may require that workers should not be fined for disciplinary reasons.

It may be difficult to stop fines immediately as the site rules may have been in place for some time, but to prevent the non-compliance re-occurring it will be necessary to make a system change.

The symptom is fines, but the root cause is a management system which may break the law. To prevent the problem re-occurring it will be necessary to make a system change for example the site could consider a system which rewards for good behaviour

Only by understanding the underlying cause can effective corrective actions be taken to ensure continuous compliance.

The site is encouraged to complete this section so as to indicate their understanding of the issues raised and the actions to be taken.

Your feedback on your experience of the audit you have observed is extremely valuable. It will help to make improvements to future versions.
